CALENDARS

Let's change something together! | Changer les choses ensemble !

We've gathered some of our environmental initiatives below:

Notre contribution pour la protection de l'environnement :

 **We use vegan papers from sustainable forestry.**
Our papers are basically made of vegan certified paper, provided by forest companies practicing sustainable and responsible forest management.

 **Our Calendars are printed in the most environmentally-friendly manner possible.**
Our printing house Kalenderfabrik Plauen, part of the publishing group, uses solely electricity from hydropower. By using regenerative energy power for calendar production, we – and also you as a customer – make an active contribution to climate protection.

 **We use vegan inks based on soy instead of petroleum to print our calendars.**
The careful selection of the printing inks used with regard to sustainability aspects is very important for us.

 **The majority of our calendars are not shrink-wrapped in foil.**
Whenever possible, we leave out shrink-wrapping for our products. For agendas and pocket calendars, family calendars, notebooks and postcard calendars we have already implemented this without exception.

 **Our special polybags consist of over 70% recycled industrial waste.**
Since 2021 we have changed our production and use only film bags made of regenerated CPP. This is a film material made from recycled industrial waste, which can also be recycled again. In preparation and testing are further alternative packaging possibilities to save even more plastics in the future.

 **Our calendars are not equipped with a plastic foil cover sheet.**
We protect and refine our cover sheets with dispersion varnishes. These refinements were completely converted to water-based finishes. Foil cover sheets have not been in use for years.

 **We choose eco-friendly PE-shopping bags.**
We have chosen PE-shopping bags, they consist of 80% of so-called recycled "post-consumer" materials.

 **Our calendars are "Made in Germany".**
From concept to printing and processing, our calendars are almost entirely made in Germany. Every calendar shows a discerning eye for the detail and many years of our experience.

 **Sustainable and environmentally conscious in trendy design.**
Our GreenLine and NatureLine products have been an integral part of our range for many years. GreenLine is one of the first sustainable calendar brands in Germany. We used to develop new designs every year and have higher demands on our products to meet our customers' requirements and expectations we placed on ourselves.

 **Nous utilisons exclusivement des papiers végétaliens issus de forêt durable.**
Nos papiers sont essentiellement fabriqués à partir de papier végétalien certifiés et proviennent essentiellement d'exploitations forestières pratiquant une gestion durable et responsable des forêts.

 **Nous imprimons nos calendriers de la façon la plus écologique possible.**
L'imprimerie de Plauen, spécialisée dans l'impression de calendriers, fait partie de notre groupe et utilise de l'électricité provenant exclusivement d'installations hydroélectriques. Grâce à l'utilisation de cette énergie renouvelable pour la fabrication de nos calendriers, nous contribuons activement – ainsi que nos clients – à la protection du climat.

 **Nous utilisons des encres végétaliennes à base de soja au lieu de pétrole pour imprimer nos calendriers.**
Nous tenons à choisir soigneusement des encres utilisées, en tenant compte des aspects de durabilité.

 **Une majorité de nos calendriers n'est pas sous film plastique.**
Dès que possible, nous renonçons entièrement à l'emballage sous film plastique de nos produits. Nous avons déjà mis en œuvre cette règle sans exception pour nos agendas de bureau et de poche, calepins, calendriers de cuisine et familiaux, agendas hebdomadaires, et calendriers cartes postales.

 **Nos sachets spéciales contiennent plus de 70 % de plastique recyclé.**
Depuis l'édition 2021 de nos calendriers, nous avons modifié notre production et utilisons uniquement des sachets plastiques en CPP recyclé. Il s'agit d'un film plastique de production recyclée pouvant lui-même être recyclé à nouveau. D'autres types d'emballages sont actuellement à l'étude pour utiliser encore moins de plastique à l'avenir.

 **Nos calendriers ne disposent plus de couvertures en plastique.**
Nous protégeons les couvertures de nos produits avec des vernis de dispersion. Ce traitement est effectué entièrement à l'aide de vernis à base d'eau. Nous avons renoncé à l'utilisation des couvertures en plastique depuis plusieurs années.

 **Nous choisissons des sacs en polyéthylène respectueux de l'environnement.**
Nous avons opté pour des sacs en polyéthylène qui sont composés à 80 % de matériaux recyclés après utilisation.

 **Nos calendriers sont « Made in Germany ».**
De la conception à l'impression et traitement nos calendriers sont presque tous fabriqués en Allemagne. Dans chaque calendrier, on retrouve l'amour du détail et les nombreuses années d'expérience qui nous caractérisent.

 **Des produits durables et écologiques dans un design tendance.**
Nos produits GreenLine et NatureLine font partie intégrante de notre programme depuis des nombreuses années. GreenLine est l'une des premières marques de calendriers durables en Allemagne. Nous développons chaque année des nouveaux designs et nous plaçons des exigences élevées sur la qualité de nos produits pour répondre aux attentes de nos clients et de nous-mêmes.
